SKU: TLC93

Mercury 652.104UK 1000w Power Inverter 12v 230v Soft Start Pure Sine Wave

These high efficiency power inverters use a pure sine wave to power 230V mains equipment from a 12V battery or DC power supply.

Perfect for use while camping, in commercial vans/lorries, or as a means to convert charged batteries for back-up power in case of a blackout.

Ideal for use with TVs, computers and many everyday appliances.

Over 90% efficiency.

Soft start minimises inverter shutdown when using large inductive loads.

High accuracy output wave form with less than 4% THD.

Reverse polarity protection.

Low/over voltage input protection.

Short circuit, overload and overheat protection.

Pure sine wave inverters are more suited for sensitive electrical devices such as laser printers, inductive devices (ballast, compressor, AC motor), variable speed control devices and audio equipment.

Inductive loads like AC motors run faster, quieter, cooler and more efficient.

Reduces audible and electrical noise in fans, fluorescent lights, audio amplifiers, TV, games consoles, fax machines, and answering machines.

May help prevent crashes in computers, glitches and noise in monitors.

These inverters are:

ErP safety compliant
